EDUCATION

Motilal Nehru National Institute of Technology (MNNIT)	2023 – Present
<i>Bachelor of Technology, Computer Science and Engineering (CPI: 8.35 / 4th Sem)</i>	<i>Prayagraj, India</i>
ST. Paul Public School	2022
<i>Intermediate (CBSE) – 90.2%</i>	<i>Begusarai, India</i>
Buddha Woodland School	2020
<i>High School (CBSE) – 92.4%</i>	<i>Samastipur, India</i>

PERSONAL PROJECTS

Adobe – Connecting the Dots Challenge — <u>GitHub Repo</u>	<i>Aug 2025</i>
- Engineered a Dockerized PDF-outline using python-based document structure analyzer and PyPDF2, enabling structured JSON generation with precise multi-level heading detection (H1–H4). - Designed an efficient local execution workflow using Docker volume mounts, ensuring seamless input-output handling for large document batches. - streamlined the processing pipeline for high-scalability applications, improving throughput for document analysis workflows.	
AI Attendance System — <u>GitHub Repo</u>	<i>May 2025</i>
- Developed an AI-driven attendance automation platform using Python, OpenCV, and face recognition achieving over 95% identification accuracy. - Accelerated recognition time by training on 100+ student face datasets with enhanced preprocessing and vector embeddings. - Integrated a responsive frontend with backend APIs enabling real-time classroom tracking and automated CSV-based attendance logging (200+ records).	
KindKonnnect — <u>GitHub Repo</u>	<i>April 2025</i>
- Built a full-stack social impact platform enabling NGOs to manage donation and volunteer campaigns using React.js, Node.js, and MongoDB. - Implemented secure Razorpay payments, user authentication, dashboard analytics, and interactive engagement features (likes, comments, posts). - Architected scalable backend APIs and optimized frontend UX for high-availability NGO operations.	

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++, Python
Libraries/Frameworks: OpenCV, Express.js, React.js
Cloud/Databases: MongoDB
Developer Tools: VS Code, Git/GitHub
Coursework: Data Structures & Algorithms, OOP, Operating Systems
Interests: AI/ML, DSA, Web Development

ACHIEVEMENTS

Amazon ML Challenge 2025 – Ranked in the **top 10%** teams nationwide while solving real-world Amazon machine learning problems involving large-scale data processing, prediction pipelines, and model optimization.

Adobe India Hackathon 2025 – Secured a position in the **top 2%** among 2.6L+ participants by building an AI-driven PDF outline extraction system using Python and Docker.

Cisco ThingQbator Cohort 8.0 – Selected for the national cohort and developing an AI-based career pathfinder prototype advancing through the Prototype Stage.

ACM–ICPC Online Qualifier 2024 – Achieved **All India Rank 2190** in the highly competitive ICPC preliminary round organized by CodeChef.

Leadership - Demonstrated cross-functional leadership by driving R&D initiatives in Enactus MNNIT, coordinating institute-level events through E-Cell, and contributing to stage productions via the Dramatics Society.
